

Company Introduction

Alisar is leading skincare, personal care, and color OEM & ODM services with pre-made formulations or creating formulas from scratch.

We help companies and business owners to strive in the beauty and cosmetic market with the use of our in-house services like packaging sourcing.

Furthermore, all steps of cosmetic production are covered by us, from raw material to product design we provide assistance at every stage.

Process	Initial project evaluation / Initial Prices	Service Model	Packaging Sourcing Formulation Development Product sample Delivery
Details	The client discusses the initial project details with the BD team	The client decides on the type of service model either OEM or ODM with buying or bespoke model. BD team will send the desired sample to the customer to decide as a benchmark referencing our product quality	Once confirmed service and preliminary quotation. Our sales operation team will work closely with the client in providing product development sampling such as packaging sourcing label design, formulation development, finish product confirmation, and delivery.
